

Request HSPD-12 Website Updates for ePACS

*As of October 3, 2013

Website Link: <http://hspd12.usda.gov/ePACSsetup.html>

The screenshot shows the USDA HSPD-12 website. At the top left is the USDA logo with the text "United States Department of Agriculture". To the right is the Lincpass logo with the tagline "simple. smart. secure.". Below the logos is a navigation bar with links: Home, About HSPD-12, Newsroom, Help, and Contact Us. A breadcrumb trail indicates "You are here: Home".

The main content area is divided into several sections:

- HSPD-12**: A list of links including Non-Employee Information, Employee Information, HSPD-12 Roles, and Policy, Procedures & Forms.
- Deployment**: A list of links including Credentiaing Centers, Light Activation Solution, Light Credentiaing Station, USAccess Program, and Hosting.
- Access Type**: A list of links including 2 Factor (Computer Access) and ePACS (Building Access), which is circled in red.

The central content area features a "Welcome" message, a "What's New" section with three entries (Two-Factor Authentication References, Light Credentiaing Station (LCS), and Light Activation Solution (LAS)), and an "Applicant / Cardholder FAQs" section. To the right, there are two sidebars: "I Want To..." with links like Learn about Role Holders and Find Agency Contacts, and "See Also" with links like USDA HSPD-12 Help Desk and FAQ.

Please update the following links under the Under the "I Want To" Section

ePACS (Building Access)

What is ePACS and What are the Benefits?

HSPD-12 established that all departments and agencies shall require the use of the LincPass to gain access to federally controlled facilities. The Departmental Management (DM) OHSEC identified the need to develop and implement ePACS to centralize, and provide a means to distribute, identity data related to LincPass credentialed individuals to all USDA Physical Access Control Systems (PACS).

ePACS will:

- Integrate several disparate PACSs into an enterprise application
- Provide a single source of verification for employee and contractor credentials
- Maintain a system that is less susceptible to identity fraud, tampering, counterfeiting and terrorist exploitation
- Provide a system that can rapidly authenticate credentials electronically
- Ensure that only providers whose reliability has been established by an official accreditation process can issue cards

ePACS (Building Access)

ePACS Architecture

ePACS is an enterprise-wide solution useable by any USDA Agency with facilities worldwide. It enables a large geographically dispersed number of facilities and users to operate the solution with the use of multiple technologies.

The following diagram depicts the ePACS architecture.
